SQL

09-08-2023

Recap

- Relational Databases
    - Relations (Tables), Attributes (Columns)
- SQL
    - Create database
    - Create tables
    - Populate the tables
    - SELECT queries over single table

SELECT all attributes

-
  ```
  SELECT  *
  FROM  <tables(s)>
  WHERE  <conditions> ;
  ```

-
  ```
  SELECT *
  FROM instructor;
  ```

-
  ```
  SELECT instructor
  FROM instructor;
  ```

Multiple Relations: Query Evaluation

-
  ```
  SELECT A1, A2,...An
  FROM r1, r2, r3...rm
  WHERE P
  ```

-
  ```
  For each tuple t1 in r1
      For each tuple t2 in r2
          ............
              For each tuple tm in rm
                  Add the concatenation of (t1,t2,t3...tm) as a row in table Temp

  For every row s in the Temp
      If s satisfies the condition P
          Then add the attributes A1,A2,...An as one of the output in Result
  ```

Multiple Relations: Query Evaluation

- Retrieve all instructors along with their department names and building.

- SELECT name, course id
  FROM instructor, teaches
  WHERE instructor.ID= teaches.ID;

Multiple Relations: Query Evaluation

-
  ```
  SELECT A1, A2,...An
  FROM r1, r2, r3...rm
  WHERE P
  ```

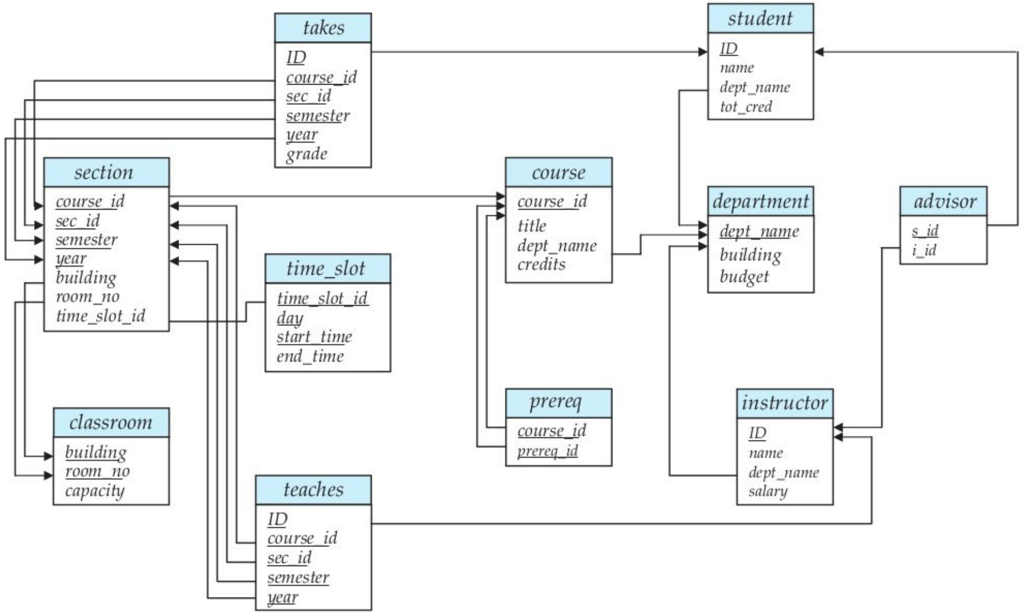
-
  ```
  For each tuple t1 in r1
      For each tuple t2 in r2
          ............
              For each tuple tm in rm
                  Add the concatenation of (t1,t2,t3...tm) as a row in table Temp

  For every row s in the Temp
      If s satisfies the condition P
          Then add the attributes A1,A2,...An as one of the output in Result
  ```

- Not done in actual interpretation
  - (intermediate table could be huge)
    More on this while discussing query optimization

Multiple Relations

- For every instructor, retrieve the instructor name, course (s)he teaches and the names of the students in the course.



takes: ID, course_id, sec_id, semester, year, grade

student: ID, name, dept_name, tot_cred

section: course_id, sec_id, semester, year, building, room_no, time_slot_id

course: course_id, title, dept_name, credits

department: dept_name, building, budget

advisor: s_id, i_id

time_slot: time_slot_id, day, start_time, end_time

prereq: course_id, prereq_id

instructor: ID, name, dept_name, salary

classroom: building, room_no, capacity

teaches: ID, course_id, sec_id, semester, year

Inserting rows to a table using SELECT

- INSERT INTO instructor
  (SELECT ID, name, dept name, 18000
  FROM student
  WHERE dept name = ’Music’ and tot_cred > 40) ;
    - (Make each student in the Music department who has earned more than 144 credit hours, an instructor in the Music department, with a salary of 18,000)
- Should the tool evaluate everything in the SELECT and then INSERT or should it do one by one?
- INSERT INTO student
  SELECT *
  FROM student
  (Assume there is no primary key)

Renaming Operator

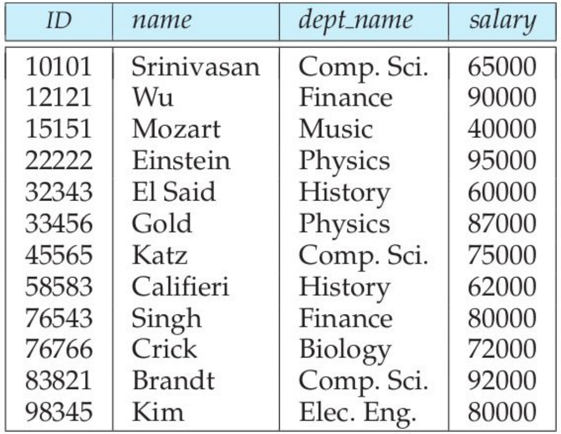
- Retrieve the names of all instructors whose salary is greater than at least one instructor in the Biology department.
  (all instructors who earn more than the lowest paid instructor in the Biology department)

-
```
SELECT distinct T.name
FROM instructor AS T, instructor as S
WHERE T.salary > S.salary and S.dept name = ‘Biology’;
```



ID	*name*	*dept_name*	*salary*
10101	Srinivasan	Comp. Sci.	65000
12121	Wu	Finance	90000
15151	Mozart	Music	40000

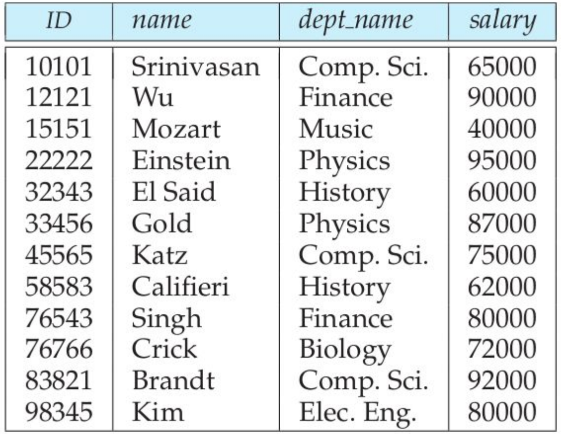
instructor

String Operators

- WHERE conditions on strings are not case sensitive
  - SELECT * FROM instructor WHERE name = ‘Srinivasan’
  - SELECT * FROM instructor WHERE name = ‘SRINIVASAN’

- For case sensitivity, use LIKE
  - SELECT * FROM instructor WHERE name LIKE ‘Srinivasan’



ID	*name*	*dept_name*	*salary*
10101	Srinivasan	Comp. Sci.	65000
12121	Wu	Finance	90000
15151	Mozart	Music	40000
22222	Einstein	Physics	95000
32343	El Said	History	60000
33456	Gold	Physics	87000
45565	Katz	Comp. Sci.	75000

83821	Brandt	Comp. Sci.	92000
98345	Kim	Elec. Eng.	80000

instructor

String Operators

- Percentage(%) matches any substring
- Underscore(_) matches any character

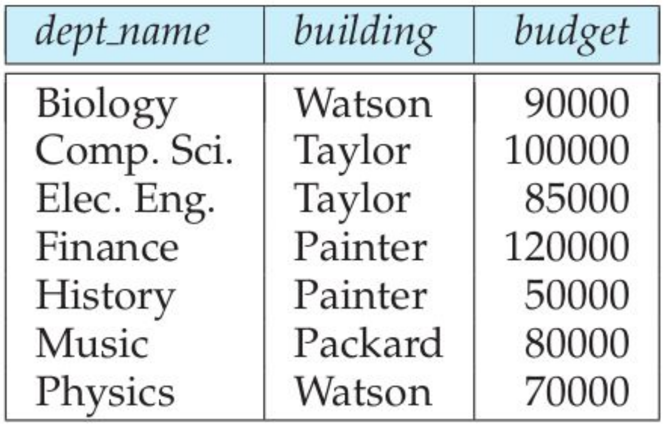
- Matching strings:
  - “S%”
  - “%Comp%”
  - “_ _ _%”

String Operators

- SELECT ....
  FROM .....
  WHERE attribute LIKE ....

- Retrieve all department names which start from a ‘vowels’

- LIKE is case sensitive



dept_name	*building*	*budget*
Biology	Watson	90000
Comp. Sci.	Taylor	100000
Elec. Eng.	Taylor	85000
Finance	Painter	120000
History	Painter	50000
Music	Packard	80000
Physics	Watson	70000

department

String Operators

- How to check if we want to check for a word that contains % or _
    - Use ESPACE
    - LIKE ‘ab\%cd%’ ESCAPE ‘\’
        - matches all strings beginning with “ab%cd”.
